SKILLS

Languages
Python, TypeScript, JavaScript, SQL, C#

Frontend & PWA
React, TypeScript, Vite, Tailwind, PWA, offline-first

Backend
Node.js, Express, FastAPI, REST, JWT, OAuth

Data & DevOps
PostgreSQL, SQL Server, Firebase, Docker, Git, Linux, CI/CD

AI & LLMs
GPT-4o, Claude, Whisper, RAG, prompt engineering, tool calling, MCP

LANGUAGES

Spanish Native

English B2 · Intermediate-Advanced

Professional summary

I'm a Full-Stack Developer who builds production software end to end — web apps (ERP, e-commerce, management tools), data & BI, and applied AI. I integrate REST APIs with Python (FastAPI) and Node.js, including ERP and messaging integrations, and I turn manual operations into software that runs itself. I'm currently a Full-Stack Developer at MN del Golfo (Tamaulipas, MX), shipping to production since 2025. Explore my work and live demos: emiliougarte65.github.io/portafolio-web/en.

Experience & projects

Full-Stack Developer · MN del Golfo 2025 – present
Materials retail chain · Tamaulipas, MX · Node.js · React · Electron · SQL Server · Firebase · Docker

- Full-stack development and AI/automation of internal production software (web apps, dashboards, integrations) used daily across the company's branches.
- I turn manual, repetitive operations into reliable automated tools, improving turnaround time and access to information for internal teams.

Dexter — open-source AI agent platform Apache 2.0
Python · Go (TUI) · SQLite (FTS5) · MCP · multi-LLM

- Configurator that extends AI agents with **46+ lazy-loaded skills** and persistent memory (Engram, SQLite FTS5). 6 platforms, 99 tests.
- Multi-LLM router with fallback (Anthropic, OpenAI, Google, Ollama); WhatsApp auto-responder, GUI control (computer use) and MCP servers.

Vértice — full-stack work-management app [Live demo ↗](#)
React · TypeScript · FastAPI · PostgreSQL · Docker · offline-first PWA

- Manage projects, quotes and payments end to end; works offline and protects access with secure authentication.

Vitrina — e-commerce storefront [Live demo ↗](#)
React · Vite · responsive UI

- Full online store: category catalog, cart with promotions, stock alerts and instant product search; fully responsive.

Dino AI — reinforcement-learning game agent [GitHub ↗](#)
Python · Stable-Baselines3 (PPO) · OpenCV · PyTorch

- An AI that learns to play Chrome's dinosaur game on its own — computer vision detects obstacles and PPO learns the right moment to jump.

Education

B.Sc. Computer Systems Engineering 2020 – 2025
Universidad Autónoma de Tamaulipas

Certifications

AI from Zero to Production — BIG School (2026) · **Data Fundamentals** — Google / Coursera (2026) · additional Coursera credentials, and Mastermind certificates in development, cybersecurity and game development.

Highlights

- ICPC Mexico Grand Prix 2022 — competitive algorithmic problem solving under pressure.
- Production, daily — software I've built runs in production every day, used by internal teams across multiple branches.
