SKILLS

Languages
Python, TypeScript, JavaScript, SQL, C#

Frontend & PWA
React, TypeScript, Vite, Tailwind, PWA, offline-first

Backend
Node.js, Express, FastAPI, REST, JWT, OAuth

Data & DevOps
PostgreSQL, SQL Server, Firebase, Docker, Git, Linux, CI/CD

AI & LLMs
GPT-4o, Claude, Whisper, RAG, prompt engineering, tool calling, MCP

LANGUAGES

Spanish Native
English B2 · Intermediate-Advanced

Professional summary

Full-Stack Developer building production software end to end — web apps (ERP, e-commerce, management tools), data & BI, and applied AI. I integrate REST APIs with Python (FastAPI) and Node.js, connecting the WhatsApp Business API and Microsoft Dynamics 365 Business Central, and I turn manual operations into software that runs itself. Currently a Full-Stack Developer at MN del Golfo (Tamaulipas, MX) since 2025, shipping to production. Explore my work and live demos: emiliougarte65.github.io/portafolio-web/en.

Experience & projects

Full-Stack Developer · MN del Golfo 2025 – present
Materials retail chain · Tamaulipas, MX · Node.js · React · Electron · SQL Server · Firebase · Docker

- Conversational BI over Microsoft Business Central: the accounting team queries data in natural language — no SQL — by typing or voice.
- 24/7 reporting bot processing **300–500 quotes per day**; sales reps receive WhatsApp summaries and the supervisor a consolidated view.
- Outdoor digital signage with scheduler and Facebook live streams, plus an offline-first PWA for in-store customer satisfaction.

Dexter — open-source AI agent platform Apache 2.0
Python · Go (TUI) · SQLite (FTS5) · MCP · multi-LLM

- Configurator that extends AI agents with **46+ lazy-loaded skills** and persistent memory (Engram, SQLite FTS5). 6 platforms, 99 tests.
- Multi-LLM router with fallback (Anthropic, OpenAI, Google, Ollama); WhatsApp auto-responder, GUI control (computer use) and MCP servers.

Education

B.Sc. Computer Systems Engineering 2020 – 2025
Universidad Autónoma de Tamaulipas

Certifications

AI from Zero to Production — BIG School (2026) · **Data Fundamentals** — Google / Coursera (2026) · additional Coursera credentials, and Mastermind certificates in development, cybersecurity and game development.

Highlights

- ICPC Mexico Grand Prix 2022 — competitive algorithmic problem solving under pressure.
- Production at scale — a 24/7 bot processes 300–500 daily quotes; conversational BI is used daily by the accounting and sales teams.
